

Business Intelligence- Insurance Policy and Claims Analysis within a conservative budget

Challenges:

Insurance companies need to quickly understand claims, reserving and policy issuance. Analytical loss triangles, loss ratio metrics, policy renewal tracking and agent performance are critical to managing a successful insurance book of business. Our BI Insurance Offering can help you achieve higher performance!

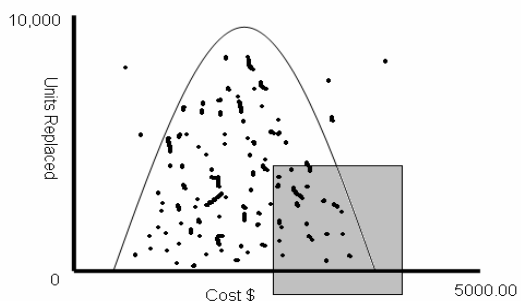

Solution:

Powered by IBM's DB2 Balanced Warehouse, FastStart solutions bundle the hardware, software, implementation services and education you need to deliver meaningful business results quickly and affordably.

FastStart Business Intelligence:

This offering includes two of the largest ROI areas for Insurance. The first area, **Claims**, contains analytics and support for:

- ▶ Claim Coverage
- ▶ Geographic Information
- ▶ Cash Reserving
- ▶ Product Liabilities
- ▶ Adjuster Performance
- ▶ Claim and Cross Claim Information
- ▶ Loss Ratios
- ▶ Stat Reporting

The second is **Policy** and is the foundational data model for information regarding:

- ▶ Insured Assets
- ▶ Policies Underwriting
- ▶ Product Performance
- ▶ Agent Performance
- ▶ Policy Feature Up Sell and Cross Sell
- ▶ Stat Reporting

Benefits to the organization are measured in several fashions:

- ▶ Identify loss expense correlations unique to the company's book of business
- ▶ Claims file and claim-cycle management
- ▶ Study claims by peril for a specific time period
- ▶ Comparing asset recovery cost value (RCV) with industry averages by region, peril and coverage
- ▶ Identify areas where loss expenses exceed tolerable levels

100k Starter Package:

Package includes:

- ▶ Policy or Claims Analysis
- ▶ Predefined Daily Updated Data
- ▶ Analyst End-User Training
- ▶ Technical Training
- ▶ Single xSeries server on Linux platform
- ▶ IBM DB2 Infosphere Warehouse with 5 Cognos licenses
- ▶ Predefined reports
- ▶ Hardware comes pre loaded and ready for your network
- ▶ Custom packages are available
